

Rattler 4

Ultra-miniature Single Link, Dual Link and Bidirectional Fiber Optic Media Converters

Lightweight, easy-to-deploy fiber connectivity solutions.

The Telecast Series' unique Rattler 4 miniature fiber optic serial digital video transmission modules from Grass Valley, a Belden Brand, offer the industry's broadest range of digital rates while maintaining the signal quality that broadcasters demand. No matter what your format, the Rattler 4 systems allow you to transmit one or two streams of:

- 3 Gb/s SMPTE 424M HD-SDI
- 1.5 Gb/s SMPTE 292M HD-SDI
- 19.4 Mb/s SMPTE 310M
- 143 to 540 Mb/s SMPTE 259M/344M
- DVB/ASI 270 Mb/s
- AES and MADI audio
- Plus non-standard digital signals to 3 Gb/s

Singles, doubles and bidirectionals

At just three inches (76.2 mm) in length, these tiny modules can be deployed almost anywhere. They are available as single transmitters and receivers, dual transmitters (Tx) and receivers (Rx), and bidirectional transceivers (TR). Each Rattler 4 Tx accepts one or two 75 ohm coaxial inputs and converts it into an optical stream via standard ST connectors. The Rx units reconvert the uncompressed signal back to BNC outputs.

Ensure pristine trouble-free signals

The Tx modules include equalization for long lengths of coaxial cable, so you can use them at nearly any point in your HD-SDI chain. The Rx modules automatically reclock the incoming SMPTE standard signals at 270 Mb/s, 1.5 Gb/s and 3 Gb/s.

Universal interoperability

Rattler 4 modules are interoperable with industry standard optical HD-SDI signals to/from other Grass Valley equipment such as routers, DAs and fiber converters from the Densité Series, NVISION routers, picoLink converters and the Telecast Series including Python, Telethon and Terrapin products. They make it easy to expand the systems that you already have and create a wide variety of network topologies.

Intuitive displays with built-in metering

Each Rattler 4 unit includes LED indicators to display Power on, HD-SDI signal presence and received optical power level on the Rx. This provides critical system diagnostic information without the need for additional test equipment, such as an optical power meter.

Available in all wavelengths

The Rattler 4 transmitters are available in standard 1310 nm and 1550 nm wavelengths, as well as in all 18 CWDM wavelengths.

Secure power

The Rattlers use their own in-line power supplies or accept any DC voltage from 5 to 16 volts via a mini-XLR4 jack.
